SECTION – A (READING)

(20)

Q1. Read the following passage and answer the questions that follow:

(10)

Climate change will have serious implications as numerous adverse impacts are expected in terms of access to clean water, food and ecosystem resources. By 2020, it is feared that in some African countries yields from rain fed agriculture could be reduced by up to 50%. Climate change is also likely to lead to some irreversible impacts on bio-diversity. However, it is within the reach of human society to meet these threats. We have to adapt to the climate change. It requires investment in storm protection and water supply infrastructures as well as community health services. Bringing changes in lifestyle is an important part of mitigation measures. Greater co—operative efforts are required by both developed and developing nations to stop emission of greenhouse gases. The youth of today have a huge responsibility towards creating a bright future and they obviously have a stake in it. They must pursue knowledge by which economic progress can take place without changing the environment.

(a) The production of grains in Africa will remain only 50% in 2020, due to:

Q2. Read the following poem carefully and answer the given questions: (10)

"Come, little leaves," said the wind one day,
 "Come over the meadows with me and play.
 Put on your dresses of red and gold;
 For summer is gone, and the days grow cold."
 Soon as the leaves heard the wind's loud call,
 Down they came fluttering, one and all.
 Over the brown field then they danced and
 Flew, Singing the soft little songs they knew.
 Dancing and whirling, the little leaves went,
 Winter had called them, and they were content.
 Soon, fast asleep on their earthy beds,
 The snow laid a coverlet over their heads.
